ABOUT

Product designer with **8 years in digital design** and **4 focused on UX/UI**, owning product work end to end — framing the problem, mapping flows, prototyping and shipping the final interface.

At Litebox I design **B2B SaaS and developer-facing products** for Silicon Valley clients — LLM platforms, API companies and fintech — inside a **shared design system in Figma**, working directly with front-end engineers.

AI is part of my daily workflow: I design in Figma and use Claude to research, explore and prototype, so ideas become clickable interfaces **in hours, not weeks**. Background in graphic design, motion and web; I founded and ran my own design studio.

SKILLS

Design — Figma (auto-layout, variables, components), design systems, UX research, usability testing, prototyping

Build — Framer, Webflow, HTML/CSS, React / Next.js

AI — Claude, Claude Code, Cursor, v0, ChatGPT

COURSES

UX/UI Design Career — Coderhouse
Oct 2021 – Feb 2022 · Final grade 10

ACADEMICS

Multimedia Designer — Escuela Multimedial DaVinci
Mar 2017 – Dec 2020 · Final grade 8.20

LANGUAGE

Spanish — Native
English — B2 · Professional working proficiency
German — A1 · Currently learning

EXPERIENCE

Hybrid Designer · Litebox

October 2025 — Present

- Design B2B SaaS and product interfaces for LLM platforms, API companies and fintech — user flows, wireframes, interactive prototypes and the final responsive UI.
- Key projects: Griffin, the UK's first full-stack Banking-as-a-Service platform, and VU Security — shaping the design direction with the client from early stages through to build.
- Work inside a shared design system in Figma (auto-layout, components, design tokens), extending and maintaining it so patterns stay consistent across projects.
- Rapid prototyping with AI tooling (Claude, Cursor, v0), turning concepts into clickable interfaces in hours rather than weeks.
- Hand off and collaborate closely with front-end engineers so designs ship as specified. 6+ products and sites delivered since October 2025.

UX/UI Designer & Brand Strategist · Avans

August 2022 — October 2025

- Created and maintained scalable design systems that held UI and brand consistency across concurrent SaaS and enterprise web products.
- Ran user research and usability testing, translating findings into information architecture and interaction design decisions.
- Built wireframes, user flows and interactive prototypes to drive discovery phases and design sprints.
- Lead designer within the UI team — ran client and stakeholder workshops and defined project direction.
- Used product metrics and user feedback to iterate and optimize design decisions.

Founder & Creative Director · Sayes

January 2018 — August 2022

- Founded and ran a digital design studio, leading creative direction and end-to-end delivery, with direct client management from pitch to launch.
- Website design and development in WordPress, ensuring responsive UX/UI experiences.
- Worked in agile teams alongside developers, marketers and product managers.
